

Energy Efficiency

- Natural Building Ventilation
- Nighttime Air Flushing to Reduce Cooling Load
- Optimized Natural Daylighting
- Low-E Insulated Glazing
- Optimized Building Shading Systems
- Enhanced Envelope at Existing Building
- Green Roof to Reduce Heating and Cooling Loads

Water Conservation

- Rainwater Collected and Channeled to Rain Garden
- Low -Flow Toilets and Fixtures
- Green Roof to Reduce Run-Off
- Green Roof to Improve Run-Off Water Quality
- Drought Tolerant Native Planting

Materials and Resource Conservation

- Existing Building Renovated
- Engineered Lumber Products
- Recycled Building Materials
- Construction Waste Management

Environmental Quality

- Operable Windows
- Daylight and Views
- Low-Emitting VOC Materials
- Dedicated Exhaust at Toilet Rooms
- Habitat Creation at Green Roof
